# Nourish your body, help the world flourish.

Did you know your food choices can benefit both your health and the planet? Choosing plant-based foods is a simple way to support a healthier lifestyle while lowering your environmental impact. They tend to produce less emissions and require fewer natural resources, such as water and land.

In partnership with WWF, we are committed to promoting healthy and sustainable diets. By 2030, we aim to increase the proportion of plant-based foods sold by 20% compared to 2023, helping you to make mindful choices that benefit both your wellbeing and the planet.

## How can you make a difference?

For a balanced and more sustainable diet, fill your plate with vegetables, wholegrains, fruits, nuts, seeds, beans, peas and lentils.

### Go plant protein!

We're adding more plant-based protein to our range. That means more beans, peas, nuts, seeds and plant-based meat alternatives for you.

### Go wholegrains!

We're boosting the amount of wholegrains like wholemeal bread, wholewheat pasta, oats, quinoa and barley in our range.

### Go veggies!

Fresh fruits and vegetables have always been at our core – and that will never change.
